31.05.2005	1.0.0	AUTOSAR Administration	Initial Release				

#### **Disclaimer**

This specification and the material contained in it, as released by AUTOSAR is for the purpose of information only. AUTOSAR and the companies that have contributed to it shall not be liable for any use of the specification.

The material contained in this specification is protected by copyright and other types of Intellectual Property Rights. The commercial exploitation of the material contained in this specification requires a license to such Intellectual Property Rights.

This specification may be utilized or reproduced without any modification, in any form or by any means, for informational purposes only.

For any other purpose, no part of the specification may be utilized or reproduced, in any form or by any means, without permission in writing from the publisher.

The AUTOSAR specifications have been developed for automotive applications only. They have neither been developed, nor tested for non-automotive applications.

The word AUTOSAR and the AUTOSAR logo are registered trademarks.

#### Advice for users

AUTOSAR Specification Documents may contain exemplary items (exemplary reference models, "use cases", and/or references to exemplary technical solutions, devices, processes or software).

Any such exemplary items are contained in the Specification Documents for illustration purposes only, and they themselves are not part of the AUTOSAR Standard. Neither their presence in such Specification Documents, nor any later documentation of AUTOSAR conformance of products actually implementing such exemplary items, imply that intellectual property rights covering such exemplary items are licensed under the same rules as applicable to the AUTOSAR Standard.

## 1 Introduction and functional overview

This document specifies the AUTOSAR standard types header file. It contains all types that are used across several modules of the basic software and that are platform and compiler independent.

It is strongly recommended that those standard types files are unique within the AUTOSAR community to guarantee unique types and to avoid types changes when changing from supplier A to B.

# 2 Acronyms and abbreviations

Acronyms and abbreviations that have a local scope are not contained in the AUTOSAR glossary. These must appear in a local glossary.

Acronym:	Description:
API	Application Programming Interface
OSEK/VDX	Offene Systeme und deren Schnittstellen für die Elektronik im Kraftfahrzeug

Abreviation:	Description:
STD	Standard

- [7] ISO/IEC 9899:1990 Programming Language C

## 4 Constraints and assumptions

### 4.1 Limitations

No limitations.

## 4.2 Applicability to car domains

Many symbols defined in this specification (like OK, NOT\_OK, ON, OFF) are already defined and used within legacy software. These conflicts ('redefinition of existing symbol') are expected, but neglected, because of the following reasons:

 AUTOSAR has to maintain network compatibility with legacy ECUs, but no software architecture compatibility with legacy software Many types are defined and used exactly in the same way that legacy software does. Legacy software can keep on using the symbols, only the definitions have to be removed and taken from this file instead.

### 5 Software Architecture

## 5.1 Dependencies to other modules

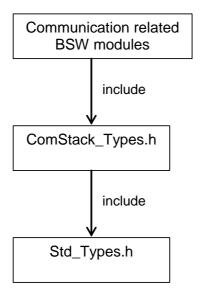

The standard types header file defines standard types based on the platform types header file (Platform\_Types.h).

#### 5.2 File structure

The include structure differ between BSW modules which are part of the COM-stack and other modules. BSW modules which is considered part of the COM stack shall include the ComStack Types.h other modules shall include Std Types.h

#### 5.2.1 Communication related BSW modules

**STD016:** : The include file structure shall be as follows:

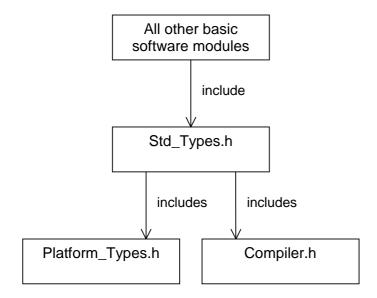

- ComStack\_Types.h shall include Std\_Types.h
- Communication related basic software modules shall include ComStack\_Types.h

### 5.2.2 Non Communication related BSW modules

**STD001:** The include file structure shall be as follows:

- Std\_Types.h shall include Platform\_Types.h
- Std\_Types.h shall include Compiler.h
- All other basic software modules shall include Std\_Types.h

# 6 Requirements traceability

Document: General Requirements on Basic Software Modules

Requirement	Satisfied by
roquiromone	Not applicable
[BSW00300] Module naming convention	(this is only a header file specification)
[201100000] Modelio Harring contonueri	Not applicable

error	(this is only a header file specification)

## 7 Functional specification

### 7.1 General issues

**STD003:**The file name of the standard types header file shall be 'Std\_Types.h'.

**STD004**: It is not allowed to add any project or supplier specific extension to this file. Any extension invalidates the AUTOSAR conformity.

**STD014**: The standard types header file shall be protected against multiple inclusion:

```
#ifndef STD_TYPES_H
#define STD_TYPES_H
..
/*
 * Contents of file
 */
..
#endif /* STD_TYPES_H */
```

# 8 API specification

## 8.1 Type definitions

## 8.1.1 Std\_ReturnType

Туре:	uint8								
Range:	E_OK			see 8.2.1, <u>STD006</u>					
	E_NOT_OK			see 8	.2.1, <u>S</u>	TD006	<u> </u>		
	0x02	-0x3	F		Availa	able to	user s	pecific	errors
Description:									return type which is shared defined as follows:
	typed	ef ui	int8 S	Std_R	eturn	Type;			
	STD011:, The Std_ReturnType shall normally be used with value E_OK or E_NOT_OK. If those return values are not sufficient user specific values can be defined by using the 6 least specific bits.								
	Layout of the Std_ReturnType shall be as stated in the RTE speand Bit 8 are reserved and defined by the RTE specification.								
	LSB				MSI				
	0 1 2 3				4	5	6	7	
	Res								
	Reserved by RTE								
	des						3	d by	
	le fûz							R	
	,								

## 8.1.2 Std\_VersionInfoType

```
type:

typedef struct
{
    uint16 vendorID;
    uint16 moduleID;
    uint8 sw_major_version;
    uint8 sw_minor_version;
    uint8 sw_patch_version;
}
Std_VersionInfoType;
```

Range:		
Description:	STD015: This type s BSW module using function.	shall be used to request the version of a g the <module name="">_GetVersionInfo()</module>

# 8.2 Symbol definitions

## 8.2.1 E\_OK, E\_NOT\_OK

Symbol/Value:	E_OK	0x00
Symbol/Value:	E_NOT_OK	0x01
Description:	to be shared. To avoid r have to be defined in the f #ifndef STATUSTYPED: #define STATUSTYPE: #define E_OK 0:	EDEFINED x00 char StatusType; /* OSEK compliance */

## 8.2.2 STD\_HIGH, STD\_LOW

Symbol/Value:	STD_HIGH	0x01
Symbol/Value:	STD_LOW	0x00
Description:	STD007: The symbols STD_HIGH and STD_LOW shall be defined as follows:	
	#define STD_HIGH 0:	x01 /* Physical state 5V or 3.3V */
	#define STD_LOW 0:	x00 /* Physical state OV */

### 8.2.3 STD\_ACTIVE, STD\_IDLE

Symbol/Value:	STD_ACTIVE	0x01
Symbol/Value:	STD_IDLE	0x00
Description:	STD013: The symbols ST	TD_ACTIVE and STD_IDLE shall be defined as
	follows:	
	#define STD_ACTIVE	0x01 /* Logical state active */
	#define STD_IDLE	0x00 /* Logical state idle */

### 8.2.4 STD\_ON, STD\_OFF

Symbol/Value:	STD_ON	0x01
Symbol/Value:	STD_OFF	0x00
Description:	STD010: The symbols STD_ON and STD_OFF shall be defined as follows:	
	#define STD_ON 0:	x01
	<pre>#define STD_OFF 0:</pre>	x00

## 8.3 Function definitions

Not applicable.

# 9 Sequence diagrams

Not applicable.

## 10 Configuration specification

## 10.1 Published parameters

[STD001\_PI] The standardized common published parameters as required by BSW00402 in the General Requirements on Basic Software Modules [1] shall be published within the header file of this module and need to be provided in the BSW Module Description. The according module abbreviation can be found in the List of Basic Software Modules [5].

Additional module-specific published parameters are listed below if applicable.
